+91 8101020120

I am a dedicated student passionate about design, specializing in front-end development. I create visually appealing and user-friendly interfaces that enhance user experience. Additionally, I have a strong foundation in Python, allowing me to engage in machine learning projects. These experiences have sharpened my technical abilities and fostered my problem-solving skills. I am eager to further expand my knowledge and apply my skills innovatively in technology and design.

EXPERIENCE

Bachelor of Computer Applications (BCA)

Global Institute of Science And Technology
Sep 2022 – Present

- Created machine learning models for predicting diabetes using techniques such as XGBoost, CNN, KNN, and others.
- Authored a research paper on diabetes prediction.
- Concentrating on web development, UI/UX design, and artificial intelligence.

Machine Learning Intern | Euphoria Gen X

Jun 2024–Aug 2024

- Gained knowledge on the functioning of machine learning models
- Created machine learning models specifically for seed classification
- Contributed to a project focused on diabetes prediction.

EXPERTISE

- HTML | CSS
- JavaScript
- TypeScript
- Python
- React.js
- Tailwind CSS
- Figma | Adobe XD
- Responsive Design

SKILLS

- Team Collaboration
- Communication
- Time Management
- Adaptability
- Project Management
